

Android APECon

P/N :: SV-APX-AND-APEC-00

APECon also known as the APEx Configuration Application allows you to control the APEx Predator or Assaulter System through an Android EUD. APECon provides system battery information, peripheral power mode control, Radio Power Wedge controls, port power controls, firmware versions, system options, and other diagnostic information.

FEATURES

- Provides port power management from the EUD (End User Device)
- Displays system temperatures and battery capacity for diagnostics
- Offers peripheral specific control, based on cable. Such as the ability to turn a TAC-ROVER SIR on or off from the EUD
- Allows you to control the Radio Power Wedge

Windows APECon

P/N :: SV-WIN-AND-APEC-00

APECon also known as the APEx Configuration Application allows you to control the APEx Predator or Assaulter System through a Windows EUD. APECon provides system battery information, peripheral power mode control, Radio Power Wedge controls, port power controls, firmware versions, system options, and other diagnostic information.

FEATURES

- Provides port power management from the EUD (End User Device)
- Displays system temperatures and battery capacity for diagnostics
- Offers peripheral specific control, based on cable. Such as the ability to turn a TAC-ROVER SIR on or off from the EUD
- Allows you to control the Radio Power Wedge
